

Sustainable Schoolyards

Summer Workshop 2026

June 23-24, 2026

9:00 to 4:00 pm each day

About This Workshop

Join us this summer for a two day workshop designed to help you learn how to nurture student involvement and voice as you implement a habitat improvement project on your campus. LREC will provide staff support, lesson plans and resources throughout the upcoming school year as you put this plan into action. Participating teachers will receive native plants for their project from LREC.

This workshop is open to **current LREC Teacher Partners** who have completed Effective Outdoor Learning (EOL) or Nature-Based Learning (NBL) in previous years.

Key Components of this Program

- ❖ Support from LREC staff in developing lesson plans & finding resources to implement a schoolyard improvement project
- ❖ Step by step guideline provided by the LREC Plant Grant
- ❖ Priority scheduling for seasonal visits to LREC
- ❖ Native plants for your schoolyard upon completion of the program

Register here:
